CJ,

As you know, I received a call about a month ago that my younger sister was diagnosed with Stage 4 Acute Myeloid Leukemia. I was blown away. The docs told us to come visit with her, that she had very little chance of survival beyond and was gravely ill. I drove down to say goodbye and to maybe see if I could be a bone marrow donor. The doc said she was too sick to receive my donation. For 17 hours I stayed at her bedside while she screamed in pain the entire time. She was on oxy, morphine, dilauded and Xanax and still in pain... too many medications to even know who I was. I kissed her goodbye and left her room. I went to my mother and handed her two things..., my mini bible and a box full of EarthWater sachets and asked her to make sure she gets this into

Fast forward to today...., I received a call that my sister was being discharged from the hospital. "What? Why?" I assumed they were going to tell me to have her go home with hospice. But, the news was quite different. "She's in REMISSION!!!", said my older sister. The doctors said that they haven't seen anything quite like this. She was SO ill and at the late stages of this disease, also fighting Lupus, as well and even in earlier stages of the disease...remission usually comes with many more months of chemo.

I cannot prove what I cannot prove, but my heart tells me that both God and Mother Nature gave her a hand in this miracle. I will never broadcast this to the world, but....., I know what I know. Soooo, to you and your beautiful product and your entire team, thank you from the bottom of my heart. I have my sister back and I honestly believe this was that beautiful black elixir, FulHum!!

Testimonial : "Dear EarthWater - This year, my sister was diagnosed with Stage 4 Retinoid Leukemia. She was too ill to even receive my bone marrow. I drove down to see her to say "goodbye", as did the rest of the family. I left my mother with sachets to sneak into her beverage. Since it really doesn't have a taste, she'd never know. Fast forward five weeks later.. she's in remission. While we cannot make medical claims and I cannot prove EarthWater was the conduit, I do believe personally it was. She was

*also receiving heavy chemo that was not working when I visited. She's now home...in remission. Again, I cannot prove this and will not publish it, but it is certainly noteworthy, especially given the many third party studies that have been done in the immunological area of fulvic/humic minerals helping the body to itself fight bacterial and disease". - Name held for privacy*
